About your Sales Representative

My name is Matt and I've been with Infinity Energy for over 8 years. Born and raised in New Jersey and studied at Kean University.

I have been working in the solar industry for 12 years helping homeowners save money and make the transition to clean energy.

WE LIVE HERE, WORK HERE & BUILD HERE

Born & Raised In
New York, New Jersey
& Connecticut

We are **Infinity**

Infinity Energy is proud to be one of the only true turn key solar providers in the northeast. We control every part of the process from your initial consultation to installation and beyond without ever subcontracting.

Infinity also has your back when you're looking for more than just solar...

Infinity is proud to be able to offer full scale roofing solutions through our sister company Infinity Roofing. Infinity roofing is a master elite GAF installer and recognized nationally among the top 2% of roofing contractors.

Need electrical work done too? Infinity has you covered! Infinity's electrical division has been servicing the north east for over 20 years handling homeowners residential electric needs using our workforce of master electricians to get the job done right.

Infinity Energy is one of the fastest growing companies in the northern United States with over 8,000 projects completed in the state of New Jersey, New York and Connecticut.

Google Reviews ★★★★☆

Sasha D.
Google Review

We had close to 40 panels installed today, and hands down, the best experience I've had with a long day of work where a crew of people came out.

Stephen J.
Google Review

Starting with Salesman Scott, our installation crew Amanda in customer service. It was a streamlined service. I can't imagine why others don't have it. The whole experience was great...

Sasha D.
Google Review

So far so good. I have nothing but positive things to say about the company especially customer service. Whenever I call with a problem they've always gotten right back to me and resolved my problem...

Jeffrey T.
Google Review

Infinity solar has been very responsive as well as understanding and addressed all my concern from the beginning. They answered all my questions throughout the process and made sure I was comfortable. The installer were very respectful

Sheily A.
Google Review

Excellent & professional service throughout the process ; highly recommend; We had great experience with everyone involved as part of process. Entire staff for back-office to installation crew has been very punctual, hardworking, honest...

Equipment Guarantee

Infinity Guarantees your production, if the system doesn't produce what we say it will, Infinity will reimburse you.

The best time to go solar
was 10 years ago,

THE SECOND BEST TIME IS NOW!

The U.S. Electricity grid is aging, inefficient, and congested. 84% of transmission lines in NY/NJ were built before 1984 and 40% need to be replaced within 30 years. The pressure is on for utilities to make the badly needed improvements.

It is estimated by 2030 the US electric utility industry will need to make a transmission and distribution infrastructure investment of about \$90 billion

To make the investments to achieve these goals, the money has to come from somewhere

That SOMEWHERE is YOU

You will ultimately pay for the majority of utility transmission and distribution improvements through increased utility rates.

This year you are paying

\$ 4,269.60

\$ 355.80

CURRENT AVERAGE
UTILITY BILL

In another 10 years, your bill amount to

\$ 5,332.15

10 years from now, you will be paying

\$ 6,825.60

Do nothing and watch your bill rise

At this rate of consumption
your 30 year cost of not switching to solar

\$39,361

30 years saving with Solar

How Solar Loan Saves You Money

Not only can solar panels save on energy costs and help the environment, it can also potentially increase your home's value*. During the past year, homes with solar panels sold for 5% more on average than comparable homes without solar.

When you buy electricity from your utility you have no other choice but to pay more when they raise their rates. When you go solar, you become your own utility. Once your system is paid off, the energy your system generates is all yours... for free

Only customers who buy their systems (whether with a loan or cash) can receive the 30% federal solar tax credit. With a loan, you have 18 months to file and receive the credit to pay down your loan and start saving.
